

Patthinan Sukutamantunt

RESUME FOR ADVISORY TECH INTERNSHIP

Tel: +6698-897-7798
Email: patthinan.s@gmail.com
LinkedIn: [Patthinan Sukutamantunt](#)

Third-year Computer Engineering student with a focus on System Analysis and Technical Documentation. Proven track record in Requirement Gathering, Functional Specification design, and UML modeling. Experienced in bridging the gap between user needs and technical implementation through data-driven insights and clear communication
In addition, I am versatile and able to take on multiple roles. I have experience in technical areas such as AI training and model pipelining, along with a solid understanding of data architecture, system architecture and also CI/CD process

EDUCATION

B.S. in Computer Engineering | Mahidol University (2023 - Now)

GPAX 2.77 (5 Semester)
Expected graduation: May 2027
Relevant Coursework: Software Design, Database Systems, Big Data Processing, Software Development & OP

PROJECTS AND PAST WORKS

Appletify Music | Technical Feasibility & Research (2026) (Group Project)

- Conducted Requirement Gathering and research on cloud infrastructure (GCP) and database management systems (PostgreSQL) to determine the optimal project stack.
- Produced a Technical Specification Report detailing the system's work process, including Sequence Diagrams for core service modules to ensure technical alignment.
- Mapped business logic to system architecture to ensure technical feasibility for a music streaming platform.

Airline On-Time Performance Analysis | Looker Studio, GCP, Hadoop HDFS (2026) (Group Project)

- Performed big data research on airline datasets to identify key drivers of flight delays.
- Utilize Google Cloud Platform (GCP) and Hadoop HDFS to process samples data
- Use Looker studio from google to visualize the data and present it as a part of Big Data Processing coursework.
- Write a report documenting the data exploration process and answering critical business questions regarding operational efficiency.

COVID-19 Vaccination Dashboard | Power BI (2025)

- Designed a star schema data model for vaccination datasets by location and manufacturer
- Developed interactive dashboards visualizing total vaccinations, vaccination rates by location, and trends by vaccine type and region
- Created visual reports using pie, bar, and line charts to effectively communicate insights across multiple dimensions (location, vaccine brand, time)

Safeans | Participation in True CyberSafe x TrueMoney Hackathon Thailand (2025)

- Conducted user research to understand pain points related to spam and scam communications.
- Developed user flows and UI designs in Figma to ensure an intuitive navigation experience for users.
- Defined the branding identity and visual structure for the mobile application.

Sentiment Analysis with VAD Scoring | Python, Google Colab (2025)

- Implemented a multi-dimensional sentiment analysis system using BERT and NRC VAD lexicon to quantify emotional valence, arousal, and dominance in textual data.

EXPERIENCES & ACTIVITIES

(Upcoming) Research Internship | Japan Advanced Institute of Science and Technology (JAIST) (2026)

- Selected for a research internship on the topic of “*Determining Emotional Value and Intensity from Patient’s Conversation*” which will be conducted during 14 May to 7 August 2026 at Japan.

Teaching Assistant, Electronics Laboratory | Mahidol University International College (2025)

- Assisted undergraduate engineering students with hands-on electronics laboratory work
- Strengthened communication skills and real-time problem-solving through student support and troubleshooting

SKILLS

System Analysis & Design:

- Requirement Gathering
- Technical Specification
- Sequence Diagrams
- UI/UX Design (Figma)
- User Research

Tools:

- SQL
- Microsoft Excel/Word/Powerpoint
- Power BI, Looker Studio
- CI/CD (Jenkins, Docker)
- Git

Soft Skills:

- Adaptable Communication
- Fast-Paced Presentation
- Requirement Gathering
- Team Collaboration.
